Date: 24 November 1998

Dear Mr Filmer

Classification of Cardox Heaters

I refer to your letter dated 16 October 1998 and HSE letter reference XI/5111/243/1 dated 16 September 1993.

It is confirmed that Cardox heaters and charged Cardox shells are considered to be **non-explosive articles** and are **not included in Class 1** of the UN system of classification for the Transport of Dangerous Goods.

I hope this information is of assistance but should you have any further queries, please contact this office.

Yours sincerely
