TO WHOM IT MAY CONCERN

The Cardox bulk materials dislodging System has been used for many years at our Ironworks at Shelton Works of the British Steel Corporation.

It has been used extensively for clearing blockages in our coal and coke bunkers, silos, furnace dust hoppers, kilns, dust legs and gas mains with complete success.

We have no hesitation in recommending Cardox to interested parties and in fact, we have demonstrated its use to other Works within British Steel Corporation.

Yours faithfully

A handwritten signature in cursive script that reads "Roland Marks".

Roland Marks
Steel Works Manager
