

**TO: Cardox International Limited**  
ATT: John Hodson

Hi John,

We have used the Cardox System twice since the training session. Once was an opportunity during a shut. The second time to break a ring. This shortened the Kiln down time by at least 3 days so I have told my bosses that **Cardox has paid for itself already!** - Here are the relevant pictures.

If anyone needs a reference for Cardox, I would be more than welcome to speak with them. My e-mail Address and Mobile Telephone number follow for this purpose.

Cheers  
Greg Barnes

Cardox Sockets  
mounted onto rotary  
kiln.  
Sockets positioned 3  
rows around  
diameter of kiln  
spaced @ 0.75m.

Cardox Tubes  
are inserted  
through Sockets  
into 'ring' build  
up.

Tubes are activated and removed
