

# **CARDOX AT SOUTHERN CROSS FERTILISERS**

**E-MAIL TO CARDOX INTERNATIONAL**  
**28 DEC 2005**

John,  
I was given you contact details by Ken West in the hope you maybe able to help us out. I have a silo that has bridged over and we need to get it unblocked by Saturday or production will stop. Ken has the F57 tube and I was wondering if I could get the details of the Nozzle / clamp arrangement so I could install these to our bin.

I have installed the nozzles for a C74 tube at Queensland Cement (now Cement Australia) before, would the F57 tube fit, as the inside diameter is 60mm and the OD of the F57 tube is only 51mm.

A quick response would be very much appreciated

Thank You  
**Dean Farley**

John,  
We installed the Cardox Sockets yesterday and used Cardox  
Much to my pleasure, we cleared the blockages by 3pm yesterday

Could you please follow up with a price for a Cardox System so I can put a proposal together for my Management

Thank you very much, this was much appreciated being on your holidays and all
